## **LAB PROJECT**

### **FINAL LAB REPORT**

COURSE CODE: CSE1005

LAB SLOT: L15 +L16

SUBMITTED BY: TEAM 5

## **ONLINE HOTEL BOOKING SYSTEM**

### **TEAM MEMBERS:**

ALAPATI SAI HARSHA VARDHAN (20BCE7401)

YARLAGADDA LAKSHMI AKSHAY KUMAR (20BCE7408)

BODINAPALLI VENKATA SIVA SAI REVANTH (20BCE7403)

MEKA RUSHIKESH (20BCE7623)

MUDADLE DHARMA TEJA (20BCE7629)

SUNKARA SRIKAR (20BCE7052)

ALAGAPPAN SP (20BCE7211)

JOVIN PALICKAL THOMAS S(20BCD7060)

B SASI PREETHAM (20BCE7362)

TALLA VENU (20BCI7169)

**PROJECT TITLE:** Online Hotel Booking System.

## **SOFTWARE REQUIREMENT ANALYSIS AND PLANNING:**

**Description of individual phase/module:**

**User characteristics:**

**System design:**

In this software we have developed some forms. The brief description about them is as follow:

### **Reservation Of Venue:**

The Customer will have an opportunity to book the hall in the hotel according to their preference, depending on the type of party and number of guests and considering the occasion the halls could be reserved by the customers. They can also add decoration options while booking the place. The charges per day of this room are displayed in the list itself.

### **Booking Rooms:**

The type of room will be displayed along with the price at the side. Number of rooms available of the selected room type will also be displayed to the customer while booking the room. The facilities provided in each room will be visible to the customer once they click on the room type.

### **Room Service:**

The services available for each room will be shown once the customer clicks on the booking room, once he selects the room type all the facilities about that room type will be displayed. In case the customer wants room service he can request for it by using the application.

### **Facilities In Hotel:**

All the facilities that the hotel has like swimming pool, conference room, gym, spa, transport, airport pickup and drop, laundry, will be provided to the customers to make their stay at the hotel memorable.

### **Taxi Service (Cab booking system):**

Our hotel provides its own taxi service from Airports, Bus Stations, Railway Stations.

#### **General constraints:**

- The time is the major constraint in any project, we are having three months' time to complete all the modules of the project.
- To provide the customers with an all-in-one application where they can access anything in the hotel at any point of time and the management will have a track on the customer needs and wants.
- The quality of the application should not be sacrificed due to time constraint or any other reason.

#### **Assumption:**

Every user knows English. All the users must know their login credentials.

#### **Functional requirements: -Input, Output, Description:**

The customers can access only what the hotel management wants them to, but the hotel management can access all the information about the customer and track what are the needs of each customer. Only the administrator can access the information of the customer but the needs of the customer will be displayed to each department of the management.

#### **Identify individual module deliverables:**

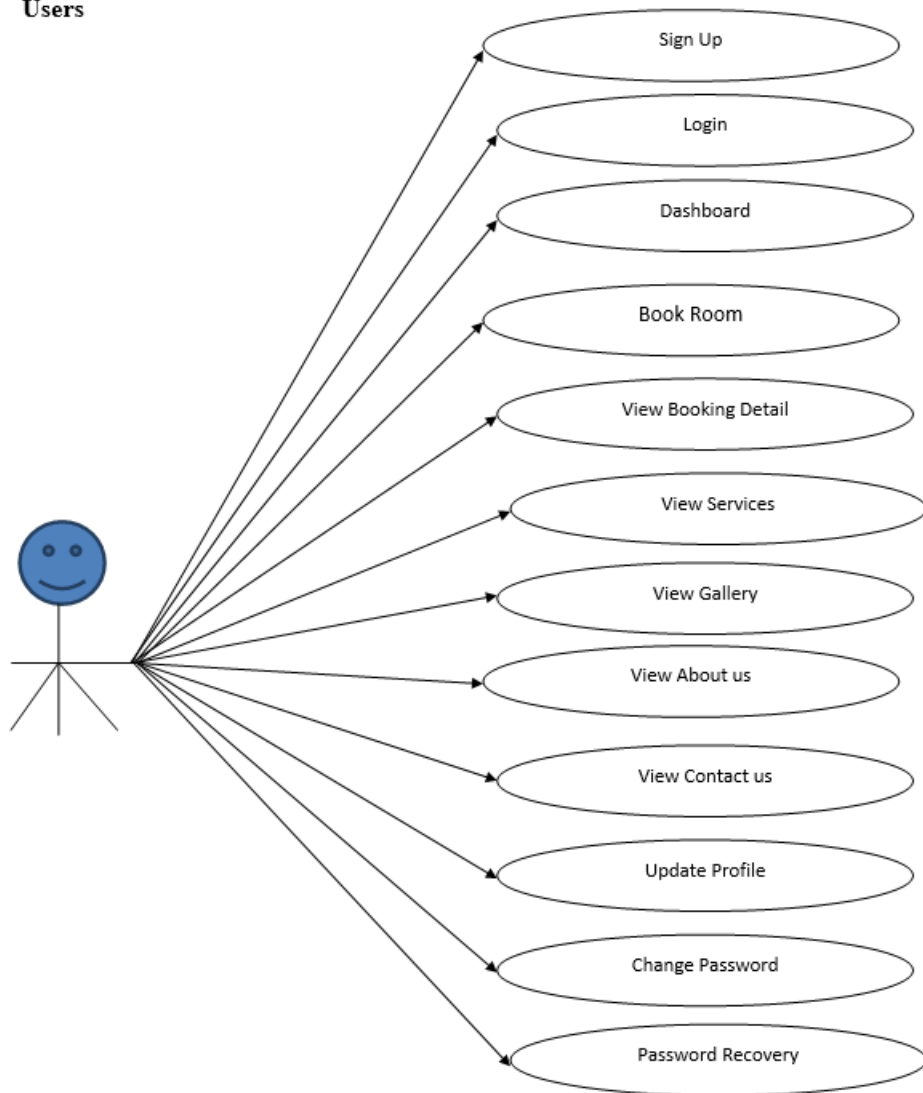

The entire project is divided into three modules:

Module	Division
Module1	The splash screen, Login screen, Introduction slides
Module2	Home Screen, Room Service, Booking Rooms

Module3	Reservation of Venue, Facilities in Hotel, cab booking
---------	--

## TEST CASES:

Test scenario	Test data	Expected result	Test results
Log In (admin)	Username: admin Password: Test@123	Successfully logged in and directed to admin page	passed
	Username: admin Password: Test@1234	Invalid details	failed
	Username: admin Password: Test@12	Invalid details	failed
	Username: admin Password: Test@123	Invalid details	failed
Log In (user)	Username: valid Password: valid	Successfully logged in and directed to home page	passed
	Username: invalid Password: invalid	Invalid details	failed
	Username: valid Password: invalid	Invalid details	failed
	Username: invalid Password: valid	Invalid details	failed
sign up	Full name: must be alphabets Mobile number: must be integers Email address: @ gmail.com is compulsory Password : must be any type	You have successfully signed in	passed
	Full name: must be alphabets Mobile number: must be integers Email address: @ gmail.com is not there Password : must be any type	Enter valid details	failed
Booking rooms	Check in date: 19-10-2022 Check out date: 21-10-2022	Your room has been book successfully. Booking Number is given	passed
	Check in date: 19-10-2022 Check out date: 10-10-2022	Check out date must be equal to / greater than check in date	failed
Search booking	Enter your booking number: If valid number is given	Details will be displayed	passed

	Enter your booking number: If it is not a valid number	No records found	failed
Search enquiry	Enter your mobile number: if it is Valid mobile number	Information will be displayed below	passed
	Enter your mobile number: if it is invalid mobile number	no record found against this search	failed
Add room	If any of the options are empty	Fill the required information	failed
	If all the options are filled	Successfully room added	passed
Reports	From date: choose date To date: choose date	If there are any records found then it will be displayed	passed
		If there are no records found then it will be empty	failed
CAB BOOKING	Form location: any location is given To location: any location is given	Cabs available	passed
	Form location to location: if location not specified	Specify a location	failed

## CODING AND IMPLEMENTATION:

### Admin page:

#### CSS:

```
atlas.css:
body{
    overflow:hidden;
}

#maps{
    position:absolute;
    top:2px;
    right: 0px;
    font: 12px ;
    font-weight:400;
    font-family: 'Roboto', sans-serif;
}

#maps > a{
    display:block;
    float:left;
    background:url(home-arrow.png) 1px left no-repeat;
    width:17px;
    height:18px;
    margin:20px 0 0 16px;
    text-indent:-99999px;
}

#maps > a:hover{
    background:url(home-arrow.png) -17px left no-repeat;
}

#maps ul{
    list-style-type:none;
    margin:28px 0 0 80px;
}

#maps li{
    float:left;
    margin-right:20px;
}
```

```
#maps li a{
